

## Riding Arena Silica Sand

**£ 0**

📍 Chester, North West

**CAggregates****01244301520**

### Description

Free draining equine surface silica sand locally sourced for quality. The sand supplied is a moist sand that doesn't blow away so much in sunny weather but compacts down so that the horse is riding on top and not in the sand. Example of 40m x 20m menage will require 160 tonnes of silica sand to give the recommended depth of between 100 and 150mm ( 4 to 6 inches depth) All prices include vat with free delivery within our 50 mile delivery zone. Email us for a outside delivery zone charge, we also deliver top up loads from 10 to 20 tonnes. Visit us at Cheshire Aggregates for Sand, Stone and Gravel from sub base stone and single sise driveway chippings
