Description

Companion horse, Experienced home, Helen has been given the award of the pony with the most unsuitable name! She thinks she should have been called Beauty Misty or Queenie Helen, She says is not a name for a horse! She arrived at Southridge in December with her field companion Dolly. She is a middleweight cob and is 9 years old When Helen was rescued by the RSPCA, She was in foal. Her foal is now fully weaned and Helen is looking for her forever home. She has a beautiful temperament although She is nervous until She gets to know you. Helen only has one eye and you need to approach her slowly and make her aware of your presence when you approach her but She is a real trooper and copes with it really well. When she first came to Southridge, She was nervous of us and catching her took a little time however with gentle encouragement through treats She is slowly getting better. Helen is a lot more relaxed when being handled now and enjoys spending time with people. She is good to catch, groom, lead, tie up, travel and is good for the Farrier and the vet. Helen must only go as a companion horse. Ideally, She would go to an owner experienced with horses.
